WORK EXPERIENCE

Lead Software Engineer | U.S. Bank – Irving Aug 2022 – Present

- Led a team of 5 software engineers, overseeing project lifecycles and implementing agile methodologies to improve efficiency and delivery timelines by 20%
- Architected and developed robust Java-based RESTful microservices using Spring Boot, integrating Kafka streams for real-time data processing and event-driven architecture
- Engineered and optimized SQL Server databases, improving query performance by 30% and implementing Graph QL alongside REST APIs for flexible and efficient data retrieval
- Established a CI/CD pipeline using Jenkins and Docker, reducing deployment time by 40% and increasing release frequency from monthly to weekly
- Orchestrated and managed deployments on Azure Kubernetes Services (AKS), ensuring 99.9% uptime and scalability for applications serving over 1 million daily users
- Incorporated comprehensive monitoring and logging solutions using Splunk and Azure Cloud services, reducing mean time to resolution (MTTR) for production issues by 50%

Software Engineer | Microsoft – Bellevue Mar 2022 – Aug 2022

- Developed enterprise-grade Java applications, leveraging Azure Cosmos DB connectors to achieve high-performance, globally distributed data management
- Designed and implemented RESTful APIs, enhancing system interoperability and enabling seamless integration with third-party services, resulting in a 25% increase in API adoption
- Orchestrated containerized applications using Azure Kubernetes Services (AKS), improving application scalability and reducing infrastructure costs by 30%
- Incorporated comprehensive monitoring solutions with Azure Monitor, reducing system downtime by 40% and improving overall application performance
- Devised serverless solutions using Python and Azure Functions, automating critical business processes and reducing operational costs by 35%
- Engineered data pipelines using Azure Databricks and Azure Data Factory, processing and analyzing over 1TB of data daily, leading to actionable business insights

Software Engineer | SharkNinja - Massachusetts Apr 2021 – Sep 2021

- Orchestrated end-to-end data pipeline from Snowflake data lake to production applications, utilizing Azure Databricks for advanced feature engineering and Azure Data Factory for efficient data movement
- Devised robust ETL processes in Azure Databricks, implementing complex feature engineering techniques that improved model accuracy by 30% and reduced data preparation time by 40%
- Designed and optimized PostgreSQL database schema, ensuring efficient storage and retrieval of processed data, resulting in a 25% improvement in query performance
- Architected and implemented RESTful APIs using Java Spring Boot microservice, facilitating seamless data flow between backend services and React frontend, handling over 1 million daily requests
- Leveraged Azure Functions to create event-driven, serverless architectures that automated communication between backend systems and frontend applications, reducing latency by 50%
- Enforced comprehensive version control strategies using GitLab and Git, improving team collaboration and reducing merge conflicts by 60%, while ensuring code quality and traceability

SKILLS

Programming Languages	Java, Python, JavaScript, TypeScript, R, HTML5, CSS3
Frameworks / Libraries	Spring Boot, React, Junit, Mockito, Kafka, Pandas, NumPy, Scikit Learn, TensorFlow
Databases	SQL Server, MySQL, PostgreSQL, Mongo DB, Cassandra, Cosmos DB, Redis
Tools	Jenkins, Docker, Kubernetes, Git, Maven, Gradle, Postman, Terraform, Splunk, Kibana
Cloud Services	AWS, Azure

EDUCATION

Lindsey Wilson University, Columbia, KY Aug 2023 - Present

Master of Science in Technology Management and Business Administration

Northeastern University, Boston, MA Jan 2020 – Dec 2021

Master of Science in Enterprise Artificial Intelligence

CERTIFICATIONS

AWS Solutions Architect Professional
